Sources, by Origin.....19.....30

PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; fluid milk production data are from farms with herds of 10 or more head; marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U. S. Mainland as well as unloads from the outer islands; and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies.

ACKNOWLEDGEMENT

The Federal-State Market News work was made possible through the cooperation of the Consumer and Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers.

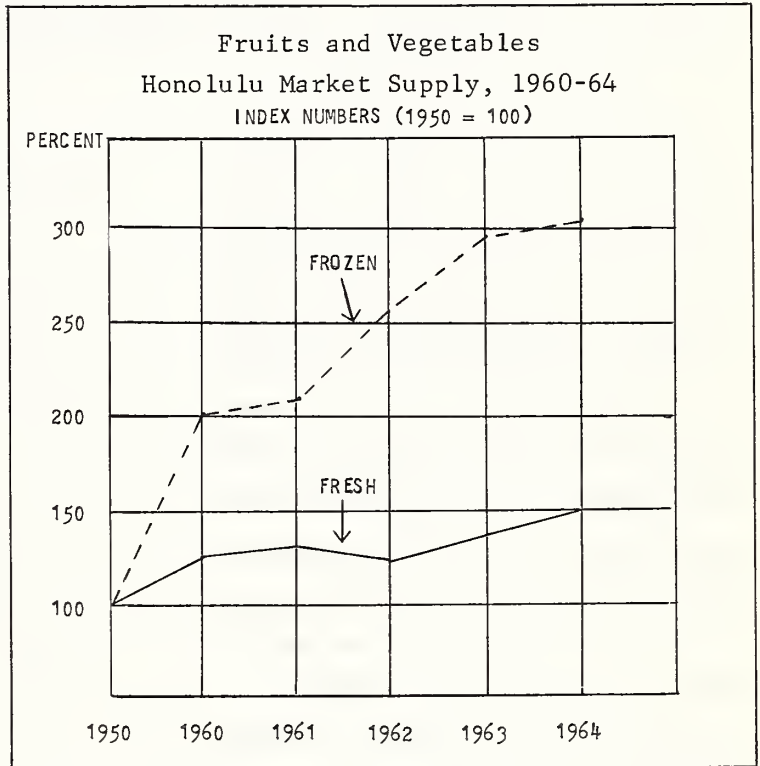

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

The total Honolulu market supply of fresh fruits and vegetables in 1964 was approximately 135.4 million pounds, an increase of nearly 14.6 million pounds, or 12 percent, over 1963. Producers in the State of Hawaii accounted for most of the increase with 13.8 million pounds. This was due to the generally favorable climate for truck crop production throughout the state in 1964.

Inshipments from the mainland and foreign countries increased only 1.0 percent in 1964 while state supplies were up 28.6 percent. Unloads from the U. S. Mainland made up 52.6 percent of the total supply, neighbor island farmers marketed 30.5 percent, Oahu's truck receipts were 15.4 percent, and foreign imports were 1.5 percent.

The neighbor island farmers continued the upward trend in movement of supplies into the Honolulu market that has existed during the past 5-year period, and in 1964 out-produced Oahu by 20.4 million pounds.

Because of convenience, less wastage and moderate prices compared with some of the fresh fruits and vegetables, inshipments of frozen fruits and vegetables have increased consistently during the 5-year period. All frozen products imports were from the mainland and amounted to 3.7 million pounds in 1964, an increase of 2.5 percent over 1963.

Selected Dairy Products and Oleomargarine

Fluid milk marketings were practically all from Oahu milk producers. In 1964, fluid milk marketings in Honolulu amounted to 114.9 million pounds, an increase of 8.7 million pounds, or 8.2 percent, above a year ago.

Imports of butter showed a decrease of 3.9 percent compared with 1963 receipts. Cheese imports increased 7.9 percent, continuing the upward trend of the past five years. Oleomargarine also recorded a respectable increase of 11.5 percent over 1963.

Poultry Products

Eggs: The total volume of fresh eggs marketed in Honolulu in 1964 was 435.9 thousand cases (30 dozen to a case), 36.7 thousand cases more than in 1963. In 1964, state poultrymen produced 93 percent of the total supply with the remaining 7 percent being derived from inshipments from the mainland.

The total supply of fresh eggs has shown a steady increase for the 5-year period, 1960-1964. State egg producers have increased their production steadily coinciding with the upward trend of the total supply marketed while imports have shown a reverse trend. In 1964, the total supply was 78.1 thousand cases more than in 1960, an increase of 21.8 percent. During the same period state production increased 111.6 thousand cases, or 38.2 percent.

In 1964, poultrymen on Oahu increased their output by 42.0 thousand cases, or 14.6 percent, over 1963. Of the state production of 403.5 thousand cases, Oahu's producers accounted for 81.6 percent.

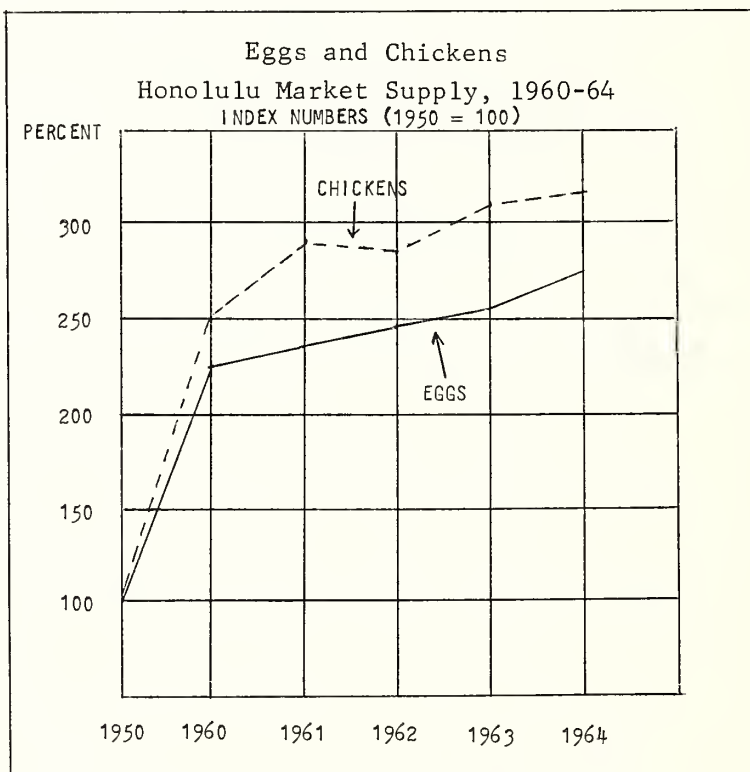

Poultry Meats: Poultry meats marketed in Honolulu in 1964 amounted to 11.1 million pounds, an increase of 108,000 pounds over 1963. However, the state's output decreased by 472,000 pounds. To meet the market requirements, inshipments of poultry meats were up 580,000 pounds. The percentage of state supply of poultry meats declined to 35 percent in 1964, the lowest for the 5-year period, 1960-1964.

Red Meats

The 1964 supply of fresh, chilled, and frozen red meats totaled 65.9 million pounds. This represents an increase of 2.3 million pounds, or nearly 4 percent over 1963.

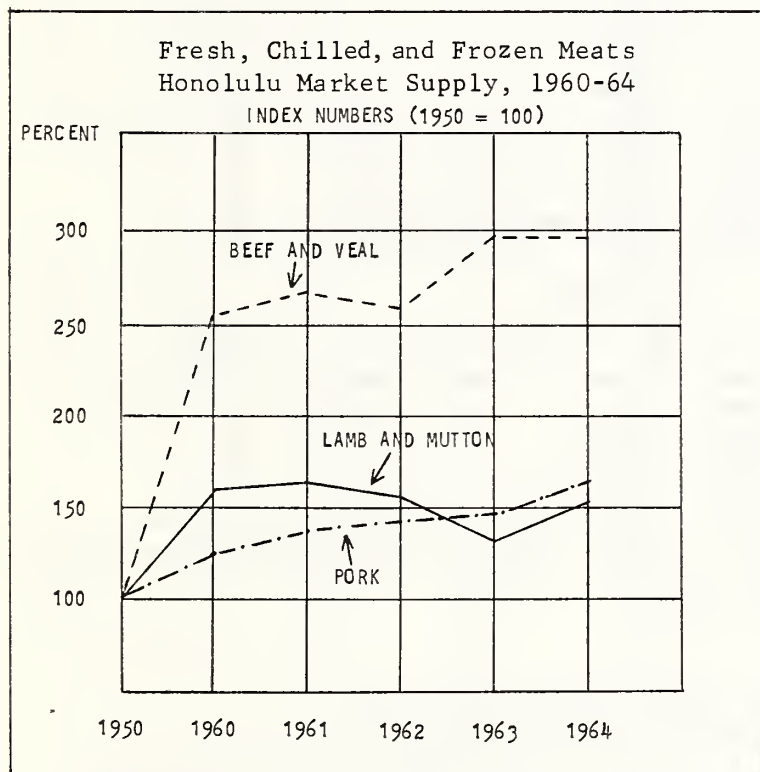

The proportions of different red meats were about the same as in 1963 with beef and veal constituting the largest volume of 70.5 percent; pork amounted to 27.8 percent; and lamb and mutton made up 1.7 percent.

Sources of supply, by point of origin, showed 39.7 percent from the U. S. Mainland; 35.6 percent from the state of Hawaii; and 24.7 percent from foreign countries, primarily from New Zealand and Australia..

Beef and Veal: In 1964, the total supply of beef and veal was 46.4 million pounds, an increase of about 0.2 million pounds, or 0.3 percent, over 1963. Inshipments from the U. S. Mainland showed an increase of 1.0 million pounds, the only source showing an increase. Foreign imports decreased 0.6 million pounds while state supplies were down about 0.3 million pounds.

Of the three sources of supply, the state contributed 36.6 percent; imports from foreign countries amounted to 34.3 percent; and the U. S. Mainland accounted for 29.1 percent. The combination of import shipments constituted 63.4 percent of the total supply, accounting for the major portion of marketings of beef and veal in the Honolulu market.

Pork: A total of 18.4 million pounds of fresh, chilled, and frozen pork were marketed in Honolulu which represents an increase of 12.2 percent over 1963. Although pork supplies in 1964 continued the upward trend of the preceding four years, state hog production has been on the reverse trend. In 1964, only 35 percent of the pork supply was from local origin, the lowest percentage ever recorded.

To meet local demand, a major source of supply was from the mainland, and during the 5-year period imports have shown a continuous rise. Of the imports of fresh, chilled, and frozen pork in 1964, 11.9 million pounds were from the U. S. Mainland and 30,000 pounds from foreign countries.

Lamb and Mutton: Marketings of lamb and mutton in Honolulu in 1964 were 1.1 million pounds, an appreciable increase of 18.2 percent over 1963. State sheep ranchers supplied only 10,000 pounds of lamb and mutton, or 1.0 percent, out of the total supply in 1964.
